

NoteSpace[®] Collaborative Notebook v. 3.2

Nouveau Systems introduces a completely new way to collaboratively capture, share and reuse information. NoteSpace is like a journal or notebook where you can write, draw, and gather information into visual workspaces, even knowledge you normally keep in your head.

- Drag and drop from local and remote files, web pages, audio, video, email, calendars and other desktop tools.
- Organize information, and add connections and annotations to capture knowledge about their relationships.
- Collaborate by sharing information and custom views in real-time and off-line..
- Protect sensitive information using encryption, authentication, and access control.

It's easy to get started. Just download your *free* Personal Edition, run the installer, and within minutes it's ready to use. It's also easy to upgrade when you're ready to deploy NoteSpace to your workgroup or your entire department.

Features and Benefits

NoteSpace provides you with these advanced features and benefits for collaboratively capturing, sharing, and reusing information.

Intuitive Graphical User Interface

Presents an intuitive graphical user interface, with user-definable templates to meet your specific requirements.

Drag and Drop Information Capture

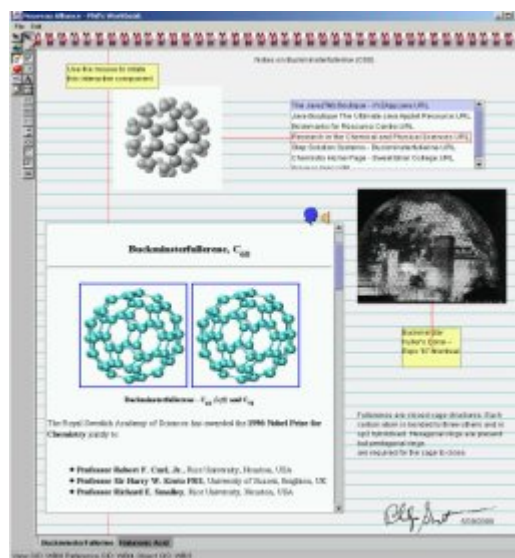

Capture information by simply dragging and dropping from local and remote file systems, web pages, emails, calendars, and other desktop tools.

Simple Integration

Integrates with your existing desktop tools and information sources out of the box and on every platform. Provides drag and drop integration of existing commercial and open-source components and controls without modification.

Collaborate Anytime, Any Place

Supports full range of collaboration functionality, including cross-workspace information sharing, flexible shared views, and both real-time and off-line collaboration.

Seamless Scalability and Simple Deployment

Provides seamless scalability from individuals and small workgroups to enterprise deployment, with no additional administrative overhead. Thanks to Nouveau Alliance intelligent peer-to-peer (P2P) technology, workspaces you create in NoteSpace can run on any Nouveau Alliance server in your network with no additional deployment.

Securely Manage and Share Information

Includes powerful, yet flexible security features for authentication, authorization, encryption, and secure communication. Based on industry standards, Seamlessly integrates with your exiting security infrastructure.

Simplified Administration

NoteSpace is simple to administer through installed desktop shortcuts and web pages. Built on the Nouveau Alliance collaboration platform, services such as persistence, databases, distribution, collaboration, peer-to-peer (P2P), security and others are managed automatically.

Complete Documentation

NoteSpace includes complete documentation, including a manual with extensive examples, usage, and reference material, a security administration guide, and complete on-line API documentation.

New in Version 3.2

Professional and Department Editions

Professional Edition provides workgroup P2P sharing and execution of workflows and real-time collaboration. *Department Edition* is an economical self-hosted version that supports users department-wide with no per-user installation.

Universal Scripting Framework

Automate tasks in Java or in popular scripting languages such as JavaScript, Ruby, Perl, Python, Tcl, Scheme. Integrate with your desktop using VBScript in Microsoft Windows and AppleScript in Mac OS X.

Integrated DerbyDB RDBMS

Store and retrieve relational data from this full-featured, fully integrated RDBMS at no extra cost. Configure data sources external to workflows. Allows easy integration with other commercial and open-source database products.

Launch from Web Browser with WebStart

Launch NoteSpace Collaborative Notebook from your web browser using WebStart. Just click the application icon or convenient desktop shortcut. Department Edition users can now launch NoteSpace from their desktops with no installation required!

Requirements

NoteSpace Collaborative notebook runs within the Nouveau Alliance® Collaboration Server, and supports a wide variety of hardware, operating systems, databases, and directory services.

Dependencies
